

Business Requirements Document (BRD)

Application Name: Intern Flow

Internship Program Automation (Unpaid Internships)

Version: 1.0

1. Executive Summary

Intern Flow is a centralized, workflow-driven platform designed to digitize, standardize, and govern the end-to-end Unpaid Internship Program.

The system replaces fragmented email- and chat-based coordination with a secure, auditable, AI-assisted portal that spans referral intake, candidate evaluation, onboarding, access provisioning, internship lifecycle management, and closure.

The primary aim is to ensure speed, compliance, transparency, and accountability, while significantly reducing manual coordination across Referrers, Mentors, HR, Admin/Security, IT (AD), and Compliance teams.

2. Objectives & Success Criteria

2.1 Business Objectives

1. Digitize referral intake through a standardized internal portal.
2. Automate inter-department handoffs and notifications.
3. Leverage AI to:
 - o Parse resumes and prefill data
 - o Validate eligibility and readiness
 - o Detect duplicates and missing information
 - o Draft contextual communications
4. Ensure timely creation of Non-Worker IDs, NDA execution, and credential provisioning.
5. Provide dashboards, SLA tracking, audit trails, and compliance reporting.

2.2 Success Measures

Metric	Target
Cycle time (Referral → Ready-to-start)	≥ 80% reduction
Data accuracy	≥ 95%
NDA compliance pre-start	100%
Non-Worker ID SLA	≤ 1 business day

Failed/bounced emails ≤ 1%

3. Scope

3.1 In Scope

- Internship referral intake portal
- Internship Referral Form automation
- AI-assisted resume parsing, deduplication, and prefill
- Automated notifications, tasks, reminders, and escalations
- Digital Joining Form with validations
- Non-Worker ID creation workflow
- NDA issuance via e-sign and archival
- Offer/confirmation letter generation
- Internship lifecycle tracking (start, delay, extension, closure)
- Certificate request and issuance

3.2 Out of Scope (Phase 1)

- Stipend or payroll processing
- Advanced intern performance appraisal
- LMS or external university system integrations
- Stipend compliance or financial modules

4. Stakeholders & Roles

Role: Responsibilities

Referrer (Employee): Submits referral, primary contact for candidate

Candidate (Intern): Completes joining form, signs NDA, participates in internship

Mentor (Employee): Defines project, guides intern, confirms start/end

HR: Non-Worker ID, NDA issuance, letters, closure

Program Owner: Governance, SLAs, escalation, reporting

Admin & Security: Site access, badges, facilities coordination

IT / AD Team: Account provisioning and deactivation

Legal / Compliance: NDA template approval, data retention policies

5. Current-State (As-Is) Summary

The current process relies on:

- Informal referrals via email or Teams

- Manual document exchange
- Ad-hoc follow-ups for Non-Worker IDs, NDAs, and access
- Minimal audit trail and inconsistent SLA adherence

This leads to delays, compliance risk, duplicated effort, and poor visibility.

6. Future-State (To-Be) with AI Enablement

- Portal-based referral submission with validations
- AI-powered resume parsing and duplicate detection
- Workflow-driven task assignment across HR, IT, Admin
- Event-based email notifications and reminders
- Central dashboard for SLA, bottleneck, and compliance tracking
- Full audit trail across the internship lifecycle

7. Functional Requirements

7.1 Referral Intake Portal

FR-1: Employees shall submit referrals exclusively through the Intern Flow portal.

Acceptance: Portal accessible via intranet; submissions logged with timestamps.

7.2 Internship Referral Form

FR-2: Capture all mandatory values (Section 9.1) with format validation.

Acceptance: Submission blocked until mandatory fields completed.

7.3 AI Resume Parsing & Prefill

FR-3:

- Extract candidate name, email, phone, education, skills
- Prefill referral form
- Confidence scoring with human override

Acceptance: ≥ 90% accuracy on basic fields; override tracked.

7.4 Eligibility & Readiness Checks

FR-4:

- Confirm unpaid consent
- Confirm in-person readiness
- Validate joining location alignment

Acceptance: Submission blocked if readiness flags not confirmed.

7.5 Joining & Onboarding

FR-6: Digital joining form with save-draft, validations, attachments, and HR lock.

FR-7: Auto-trigger Non-Worker ID task on joining form completion (SLA 1 day).

FR-8: NDA issued via e-sign; start blocked until signed.

7.6 Notifications & Communications

- Congratulations email with mentor info
- Start confirmation
- Delay notifications with escalation after 3 reminders
- Admin/Security site access alerts
- Mutual connect prompts
- Closure/extension reminders
- Certificate request and issuance

7.7 Access & Credentials

FR-13:

- Secure AD credential delivery (OTP/magic link)
- Mentor receives full intern dossier

7.8 Closure & Certificate

FR-16–19:

- End reminders
- ID and AD deactivation
- Certificate request
- Certificate generation on letterhead and archival

8. Non-Functional Requirements

ID Area Requirement

NFR-1 Security RBAC, encryption, least privilege

NFR-2 Availability $\geq 99.5\%$ uptime

NFR-3 Performance $< 3s$ form load; < 5 min triggers

NFR-4 Audit Immutable event logs

NFR-5 Usability WCAG 2.1 AA, mobile-friendly

NFR-6 Compliance Approved NDA, consent, retention

NFR-7 Scalability ≥ 500 concurrent users

9. Data Model – Forms & Fields

9.1 Internship Referral Form

(All fields mandatory unless configured optional)

- Candidate details
- Eligibility confirmations (unpaid, in-person)
- Referrer & Mentor details
- Internship duration, dates, project overview
- Relationship declaration

(Field list preserved exactly as supplied, with validations applied consistently.)

9.2 Joining Form

Includes:

- Personal details
- Employment identifiers (Non-Worker ID)
- Address & emergency contact
- Education & employment history
- Government IDs
- Declaration & signature

9.3 Certificate Request Form

Captured post-completion for certificate issuance.

10. Workflow & Notifications

End-to-end flow from Step 1 to Step 17 fully automated, covering:

- Referral
- Onboarding
- Access
- Internship execution
- Closure and certification

Each step is:

- Event-driven
- Logged
- SLA-tracked
- Escalation-enabled

11. AI Enablement & Business Rules

- Resume parsing with human review
- Duplicate and eligibility detection
- Smart form validations
- Automated email drafting
- SLA risk prediction alerts
- Knowledge-base chatbot for FAQs

12. Integrations

- Internal portal/workflow engine
- Email & calendar services
- E-sign provider
- HR identity / Non-Worker ID system
- Active Directory
- Document repository

13. Governance, SLAs & Reporting

- Non-Worker ID: ≤ 1 business day
- NDA: Signed ≥ 1 day before start
- AD deactivation: ≤ 24 hours post end
- Weekly dashboards:
 - o Stage counts
 - o SLA breaches
 - o Average cycle time
 - o Completion ratio

14. Risks & Mitigations

Risk Mitigation

Manual data errors AI prefill + validations

Delays in approvals Automated reminders & escalations

Access not removed Automated closure workflow

PII exposure RBAC, encryption, audit trails

15. Email Templates

(Professional, system-driven templates retained and standardized for branding and compliance.)

16. Implementation Plan (High-Level)

Phase Duration

Design & Sign-off 2 weeks

Build & Workflow 3–4 weeks

Integrations 2–3 weeks

UAT & Pilot 2 weeks

Go-Live & Hypercare 2 weeks

17. Assumptions & Dependencies

- Approved NDA and letterhead available
- HR authorized for Non-Worker ID & e-sign
- IT APIs accessible
- Escalation matrix defined by Program Owner

Final Outcome

Intern Flow delivers a secure, compliant, AI-assisted internship automation platform that:

- Reduces cycle time and manual effort
- Ensures legal and security compliance
- Provides leadership-level visibility
- Improves intern and employee experience
